Lanchester Inspires Student Success,

Aerospace Systems Engineering graduate, Richard Daintree, has been selected as the winner of the prestigious **Lanchester Trust Student Prize**, for his investigation into the work of Dr. Frederick Lanchester. Richard, from Somerset, was duly presented with a cash prize and a certificate in honour of his achievement.

The criterion for the annual award is set by the Lanchester Trustees, Chris Clark, Malcolm Whitehouse and Eric Baptiste. It is awarded for enterprise, initiative, creativity and invention as demonstrated by a University student.

Richard explained: "I was delighted to hear I'd won the award. I simply tried my best to achieve the goals of dissertation, which was an investigation into some of Lanchester's work. I found Lanchester's work very interesting and as a result put a great deal of hard work into research and analysis of his designs. This was the ultimate reward".

The Trustees commented that, "We are delighted that Richard has won the Lanchester Trust Student Prize. Richard is obviously inspired and enlightened by the work of the Lanchester brothers.

Richard hopes to train as a commercial pilot and is in the process of applying for a place at a flight school. He'll use the prize money to pay for his selection day fee at the flight school.
